

## DairyNZ BCS Calibration App Change Requests:

- 1) Change sort order of trainee scores on the result screen when filtering by an individual trainee:

Currently when logged in as a **Trainer** and you go into the Results screen to review trainee scores, it defaults to 'All Trainees' and the scores are listed in ascending order by tag #, e.g 1 - 70

This is fine and works for the 'All Trainees' filter, see below.

TAG	TRAINER	SCORE	1ST SCORE	2ND SCORE
1	Joey He...	2.5	2.5	
	Julie Sa...	2.5	3.0	3.0
	Pooja Tr...	2.5	2.5	
2	Joey He...	3.0	3.0	

Then, when you filter by Trainee, it *still* sorts by tag number in ascending order.

We want to update this so when a trainer changes the filter to look at the individual trainee, (vs all trainees), **it sorts by the order the trainee has entered their scores.**

Then a trainer will be able to see if the trainee is improving or not.

**Please let me know how long this will take to do.**

- 2) Add the ability to edit a cow tag number:

Currently both a trainer and trainee cannot currently change the tag number of a scored cow. When you edit it, you can only change the score.

We need to update it so:

Trainers can 'Edit' a score and the tag field is also open to be able to be edited.

If Trainees are given the option to change a score, that they can also change the tag number.

**Please let me know how long this will take to do.**
